

Migrating from the Automated Test Suite to the Automation Library

Migrating from the ATS to the Automation Library is a simple 3 step process. The new Automation Library will automatically appear in your update client if you are a current user of the ATS.

- 1) Run the MyUpdater and Install the Automation library

Name	Published On	Action	Setup
Automation Library	2015/12/09		Install
Automated Testing Suite	2017/01/20	Browse	Remove
GFortran 4.6	2013/05/01		Install
PSCAD 4.6.1 (64-bit)	2015/12/09		Install

- 2) In each of your Python user scripts, change the **System Path** to use the new Automation Library.

Note: This path is near the top of your script.

Old Path

```
sys.path.append(r"C:\Program Files (x86)\AutomatedTestSuite")
```

New Path

```
sys.path.append(r"C:\Program Files (x86)\PSCAD\Automation\Lib\mhrc")
```

- 3) Now your scripts will point to the new Automation Library and you can uninstall the Automated Test Suite.

Name	Published On	Action	Setup
Automation Library	2015/12/09	Browse	Remove
Automated Testing Suite	2017/01/20	Browse	Remove
GFortran 4.6	2013/05/01		Install
